

Connect. Create. Collaborate. Securely.

A platform for secure multi-agency and industry collaboration of classified content.

Security and productivity are critical to your agency

One of the biggest issues facing government in a digital age is how to securely share and collaborate on classified information.

Foreign actors and cyber criminals are targeting this information, which can threaten national security and lead to financial and reputational harm. In a digital age collaboration is required to improve productivity and efficient decision making.

Kojensi Gov is the most secure way to collaborate digitally

Kojensi Gov is a PROTECTED cloud service that enables government and industry to securely share and collaborate on classified information.

Our industry leading attribute based security model makes the Kojensi platform unique. User and document attributes control the flow of information and facilitate secure sharing within your agency and across agencies and their industry partners.

Keep documents secure

Only those documents approved for release can be downloaded and used outside of the Kojensi Gov platform.

Ensure compliance

Kojensi Gov is hosted locally by an ASD-certified PROTECTED cloud provider. Kojensi Gov is also PSPF and ISM compliant.

Increase productivity

Kojensi Gov provides a suite of collaboration features, each designed to improve productivity.

Collaborate with anyone

Kojensi Gov allows you to securely share large files and collaborate between and within government and industry.

Collaboration that is simple, secure and effective

Users of Kojensi Gov can create, share and edit documents, chat about their edits, set tasks and workflows all in a secure environment.

Distributed Administration

There are no super users inside of Kojensi Gov, you control the data you create or upload and who you share it with.

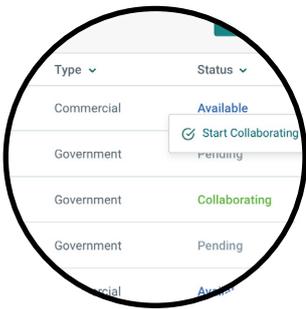

Secure Online Editing

Create, share and co-author documents, tracking your changes as you go.

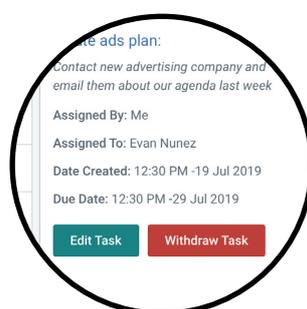

Security Controls and Settings

Use the security controls to decide who will access your documents, including security level, organisation and country.

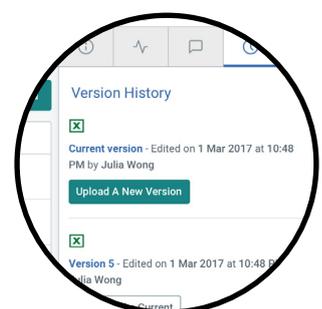

Inter-agency Collaboration

Collaborate within your agency, with other agencies and industry partners at different security levels.

Tasks and Workflows

Set tasks and workflows for yourself and others, helping you to better communicate and meet deadlines.

Document Version Control

A fully integrated content and records management system allows you to retain and access all versions of a document.
