

# Connect. Create. Collaborate. Securely.

A multi-level security platform for collaboration of highly classified content.

## Security and productivity are critical to your agency

One of the biggest issues facing government in a digital age is how to securely share and collaborate on highly classified information.

Foreign actors and cyber criminals are targeting this information, which can threaten national security and lead to financial and reputational harm. In a digital age collaboration is required to improve productivity and efficient decision making.

## Kojensi is the most secure way to collaborate digitally

Kojensi is a multi-level security on-premise platform that enables government to securely share and collaborate on highly classified information.

Our industry leading attribute based security model makes the Kojensi platform unique. User and document attributes control the flow of information and facilitate secure sharing within your agency and across agencies.

### Keep documents secure

Only those documents approved for release can be downloaded and used outside of the Kojensi platform.

### TOP SECRET compliance

The security platform that underpins Kojensi has been accredited to TOP SECRET / SCI in Australia and the US.

### Increase productivity

Kojensi provides a suite of collaboration features, each designed to improve agency productivity.

### Collaborate securely

Kojensi allows you to securely collaborate and share documents and files within and between government agencies.

# Collaboration that is simple, secure and effective

Users of Kojensi can create, share and edit documents, chat about their edits, set tasks and workflows all in a highly secure environment.

## Distributed Administration

There are no super users inside of Kojensi, you control the data you create or upload and who you share it with.

## Secure Online Editing

Create, share and co-author documents, tracking your changes as you go.

## Security Controls and Settings

Use the security controls to decide who will access your documents, including security level, organisation and country.

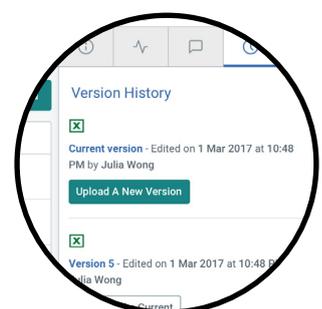

## Inter-agency Collaboration

Collaborate within your agency and with other agencies, at different security levels.

## Tasks and Workflows

Set tasks and workflows for yourself and others, helping you to better communicate and meet deadlines.

## Document Version Control

A fully integrated content and records management system allows you to retain and access all versions of a document.

## Multi-level security and compliance

PSPF

Kojensi helps you meet your mandatory PSPF information security requirements out-of-the-box by enabling users to apply protective markings.

ISM

Kojensi meets the stringent information security controls set out in the Australian Government's Information Security Manual (ISM).

Privacy Act

Kojensi assists agencies in marking and managing private information, to better comply with the Australian National Privacy Principles.
