

# Your information, your rules

A secure collaboration platform for sensitive and classified research and content

## Security and productivity are critical to your organisation

One of the biggest issues facing organisations in a digital age is how to securely share and collaborate on classified information.

Foreign actors and cyber criminals are targeting this information, which can threaten national security and lead to financial and reputational harm. In a digital age collaboration is required to provide organisations with the complete picture for increased productivity and efficient research outcomes.

## Kojensi is the most secure way to collaborate digitally

Kojensi is a PROTECTED cloud service that enables organisations to securely share and collaborate on classified information.

Kojensi's industry leading attribute based security model (ABAC) makes the Kojensi platform unique. User and document attributes control the flow of information and facilitate secure sharing within and between organisations such as Universities, Government, Defence and Industry.

### Keep documents secure

Documents and file access are controlled by attributes including security classification, country and organisational releasability.

### Ensure compliance

Kojensi is hosted locally by an ASD-certified PROTECTED cloud provider. Kojensi is also PSPF and ISM compliant.

### Increase productivity

Kojensi provides a suite of collaboration features, each designed to improve productivity.

### Collaborate with anyone

Kojensi allows you to securely share large files and collaborate between and within organisations.

# Intuitive collaboration delivering the complete picture, quickly

Users of Kojensi can create, share and co-author documents in real-time, all in a secure and intuitive platform.

## Distributed Administration

There are no super users inside of Kojensi, you control the data you create or upload and who you share it with.

## Secure Online Editing

Create, share and co-author documents, tracking your changes as you go.

## Security Controls and Settings

Use the security controls to decide who will access your documents/files, including security level, organisation and country.

## Secure External Collaboration

Collaborate within your organisation and with other organisations at different security levels.

## Search and Discoverability

Control whether documents/files are private or discoverable in search, by adding markings for discoverability.

## Document and File Version Control

A fully integrated content and records management system allows you to retain and access all versions of a document or file.

## Get started with Kojensi today

Available from archTIS or through the DTA's Cloud Marketplace

Ready to use, with minimal setup
