

# MULTI-LEVEL SECURITY CLASSIFIED INFORMATION SHARING & DOCUMENT COLLABORATION SAAS PLATFORM

## KOJENSI SAAS BENEFITS

### Keep Sensitive Documents Secure

Control access and sharing with granular, zero trust ABAC policies including security classification, country and organisational releasability.

### Ensure Compliance

Kojensi allows organisations to easily comply with local and international compliance requirements such as ITAR, EAR and DISP.

### Increase Productivity

Kojensi provides a suite of document management and collaboration features, each designed to improve productivity without impacting security.

### Collaborate Securely

Kojensi allows users to quickly and securely share files between and within organisations and provide viewing, co-editing and collaboration on documents.

## SAFEGUARDING DEFENCE SUPPLY CHAIN DATA

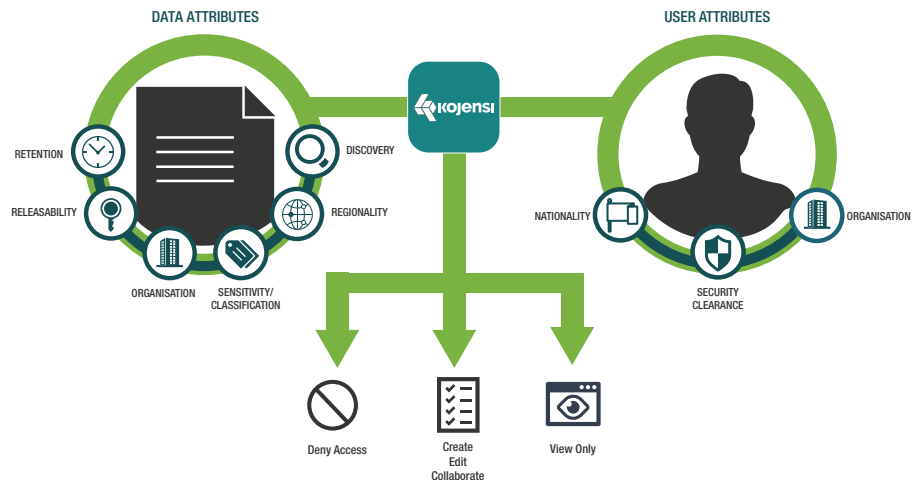

Foreign actors and cyber criminals continue to target high value, sovereign capabilities and supply chains, threatening national security and leading to financial and reputational harm. As a result, one of the biggest issues facing the Defence Industry is how to securely share and collaborate on classified information between and within Defence and Industry.

The Defence Industry needs a platform to securely share sensitive project and tender information with contractors, subcontractors, offshore employees and Defence agencies.

## SHARE SENSITIVE INFORMATION SECURELY WITH KOJENSI SAAS

Kojensi is an Australian Government Accredited PROTECTED SaaS platform that enables small and large Defence Industry companies, Defence, Government and other partners to securely share and collaborate on classified information, all within a secure, controlled information environment.

## PROTECT FILES WITH ATTRIBUTE-BASED ACCESS AND SECURITY CONTROLS

Kojensi's industry leading attribute based security model (ABAC) makes the Kojensi platform unique. User and document attributes control the flow of information and facilitate secure sharing to validate access and sharing policies each and every time a file is accessed or shared internally or with industry partners.

# KOJENSI DELIVERS SECURE, INTUITIVE DOCUMENT COLLABORATION AND SHARING

Kojensi users can create, share and co-author documents in real-time, all within a secure and intuitive platform that ensures only the right users have access to the right information at the right time.

## Distributed Administration

File owners control the access to information created or uploaded and who it is shared with.

## Secure Online Editing

Create, share and co-author documents, spreadsheets and presentations. Track edits, leave comments or chat with co-authors.

## Attribute-based Security

Using file-level attribute-based access controls, owners can determine who has access to the files by utilising attributes such as security level and country.

## Document Version Control

Kojensi allows you to retain and access all versions of a file or document.

## Secure Viewing & Watermarks

Secure content (documents, PDFs, images, etc.) with Kojensi's in-app read only document viewer and watermarking tool to reduce leaks.

## Search & Discoverability

The file owner controls if a document is private or discoverable in search to prevent unauthorized users from seeing files in search results.

## Dashboards

Provides administrative users with access to real-time account administration and workspace utilisation.

## Audit / Logs

Kojensi by nature is a fully auditing platform that records a full user interaction history of all changes made to files, workspaces and other administrative tasks.

## MULTI-LEVEL SECURITY AND COMPLIANCE

### Designed for Compliance

Kojensi assists organisations to easily comply with compliance requirements such as ITAR, ISM, DISP and PSPF.

### Data Hosted Locally

Data is hosted locally in Australia by an ASD-certified PROTECTED cloud provider, ensuring all data is stored and processed in local data centres.

### Classifications and Markings

Kojensi allows you to add native country specific classifications, helping you to protect highly classified, sovereign information.
