

MULTI-LEVEL SECURITY DOCUMENT COLLABORATION & SHARING PLATFORM

KOJENSI ENTERPRISE BENEFITS

Keep Sensitive Documents Secure

Control access and sharing with granular, zero trust ABAC policies including security classification, country and organisational releasability.

TOP SECRET Compliance

Kojensi Enterprise is available on premise or in a private cloud, with its security model accredited up to TOP SECRET/SCI.

Increase Productivity

Kojensi provides a suite of document management and collaboration features, each designed to improve productivity without impacting security.

Collaborate Securely

Kojensi allows users to quickly and securely share files between and within organisations and provide viewing, co-editing and collaboration on documents.

SECURITY AND PRODUCTIVITY ARE MISSION CRITICAL

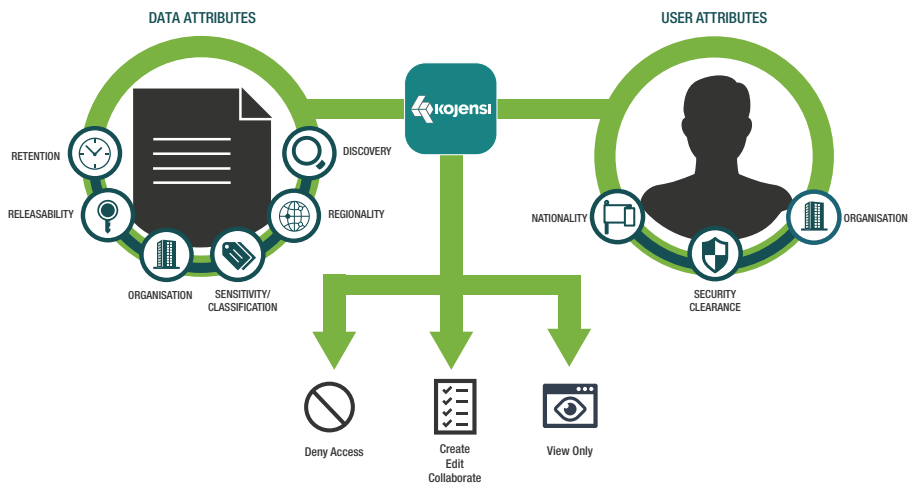

One of the critical, global issues in a digital age is how to securely share and collaborate on highly classified information. Foreign actors and cyber criminals are targeting this information, posing a serious risk to sovereign information and national security.

The challenge is to share this information between nations, Defence, government and industry, securely. Securely sharing and collaborating on information delivers a complete picture quickly, increasing productivity and response times, which leads to more effective decision making.

SHARE SENSITIVE INFORMATION SECURELY WITH KOJENSI ENTERPRISE

Kojensi Enterprise is a modern, sophisticated multi-level security platform that allows you to securely share and collaborate on highly classified information within your organization and with partners. Kojensi enables secure, compartmentalized collaboration out of the box for less time and money.

PROTECT FILES WITH ATTRIBUTE-BASED ACCESS AND SECURITY CONTROLS

Kojensi's industry leading Attribute Based Access Control (ABAC) security model allows you to define the rules of who accesses information, and under what conditions, providing access to the right people, at the right time. An ABAC security model ensures information is secured not only at the perimeter but also within the system.

KOJENSI DELIVERS SECURE, INTUITIVE DOCUMENT COLLABORATION AND SHARING

Kojensi users can create, share and co-author documents in real-time, all within a secure and intuitive platform that ensures only the right users have access to the right information at the right time.

Distributed Administration

There are no super users inside of Kojensi. File owners control the information created or uploaded and who it is shared with.

Secure Online Editing

Create, share and co-author documents, spreadsheets and presentations. Track edits, versions, leave comments or chat with co-authors.

Attribute-based Security

Using file-level attribute-based access controls, owners can determine who has access to the files by utilising attributes such as security level and country.

Search & Discoverability

The file owner controls if a document is private or discoverable in search to prevent unauthorized users from seeing files in search results.

Secure Viewing & Watermarks

Secure content (documents, PDFs, images, etc.) with Kojensi's in-app read only document viewer and watermarking tool to reduce leaks.

Multi-coalition Collaboration

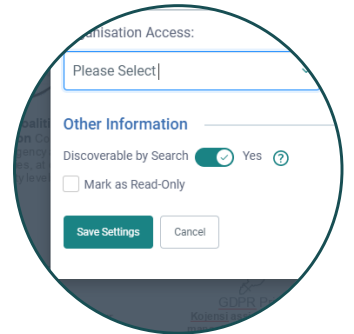

Share and work together on classified information using security classification, organisation and country releasability to determine access and usage rights.

Dashboards

Provides administrative users with access to real-time account administration and workspace utilisation.

Audit / Logs

Kojensi by nature is a fully auditing platform that records a full user interaction history of all changes made to files, workspaces and other administrative tasks.

MULTI-LEVEL SECURITY AND COMPLIANCE

Designed for Compliance

Kojensi allows organisations to easily comply with compliance requirements such as ITAR, ISM, DISP, PSPF, privacy acts, etc.

InfoSec

Kojensi Enterprise helps you meet your organisation's and partner's mandatory infosec requirements.

Classifications and Markings

Kojensi allows you to add native country specific classifications, helping you to protect highly classified, sovereign information.
